Rev. 1.0 03/08

Revision History

March 2008 Revision 1.0—initial release

SanDisk®

EXTEND YOUR PRODUCTIVITY
BY WORKING OUTSIDE THE
OFFICE.

WORK IN AN ENVIRONMENT
YOU KNOW AND TRUST.

STAY LIGHTWEIGHT.

Supporting the trend of “Day Extender” employees seeking greater flexibility, while enabling them to remain highly productive poses a multi-faceted challenge to IT decision makers. First and foremost, they are committed to address the challenge of data leakage prevention (DLP). Second, they must make it easy for employees to securely and cost-effectively access the data and applications they need. Third, they are required to provide employees with their organization’s standard computing environment that is both familiar and immediately available wherever they go. All this, while being able to provide standard support to users, and minimize any burden increase on the IT Help Desk.

As always, driving down cost of ownership in a time when IT challenges are continuously adding up remains an attractive proposition.

SanDisk and Check Point have combined forces to introduce a new and exciting secure, portable workspace on a USB flash drive. It runs on any Windows® host PC and provides users with their work desktop, data and applications while working online or offline on their home PC, visiting a customer, or using any compatible host PC.

ADVANCE INFORMATION

Beyond Secure Storage - A Secure and Managed Virtual Workspace

IT decision makers can take advantage of this unique solution to:

- Provide employees with a consistent, controlled, encrypted and secure virtual workspace that is independent of the host computer
- Enforce mandatory access control on all files, stored in a hardware-encrypted, password-protected partition
- Centrally manage employees' workspace environments
- Apply granular security policies for different groups of users
- Enable compliance with privacy regulations

Employees will enjoy benefits such as:

- Their own familiar work environment on host computers when they plug in their SanDisk Cruiser Enterprise drives
- The ease of a pocket-sized drive with enough storage to transport all critical data and applications
- Ultra-fast data transfer speeds

- Access to a virtual private network (Check Point Secured Access and Authentication) to use corporate data and other IT resources outside the office
- Access to applications on host computers without concern of leaving traces

All of this is available in a secure USB flash drive at a fraction of the purchase and maintenance cost of a laptop.

ADVANCE INFORMATION

Usage Scenarios

SanDisk Cruzer Enterprise USB flash drive equipped with Check Point software can bring benefits to a wide range of users. Consider these use cases:

- Day Extenders who extend their office hours by working on the road and from home
- Employees who use business centers in hotels or transportation lounges
- Consultants who are not permitted to take their own laptops onto a client's premises
- Corporate partners with temporary access to limited data
- Temporary workers who sporadically use corporate terminals

Product Features

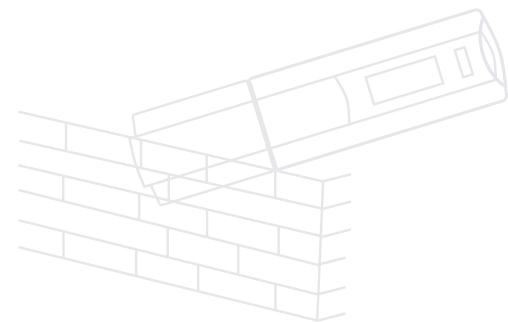

- Hardware-based 256-bit AES encryption
- Mandatory security of all files (100% private partition)
- Strong password policy
- Lockdown mode after a set number of incorrect password attempts
- Central management and control (CMC) client/server software (sold separately) for management and regulatory requirements (Optional)
- Ultra-fast transfer speed: 24MB/s Read, 20MB/s Write¹
- Available with 1, 2, 4 or 8GB² flash memory

Software Security Features

- Secure workspace
- Compliance and malware check (ICS)
- Secured access and authentication

Supported Platforms

- Windows 2000 SP4 or higher
- Windows XP SP1 or higher
- Windows 2003 server
- Windows Vista

¹Based on internal testing; performance may be lower depending upon host device.

² 1 megabyte (MB) = 1 million bytes. 1 gigabyte (GB) = 1 billion bytes.
